CHAMP D'APPLICATION DU PRESENT CAHIER DES CHARGES / *SCOPE OF THIS PROTOCOLE*

En référence à la Directive 2001/95/CE relative à la sécurité générale des produits, et aux documents normatifs pertinents dans la mesure où aucune norme relative à ce type de produit n'existe à ce jour. / *With reference to Directive 2001/95/EC on general product safety and combined with relevant childcare articles standards as there is no European standard existing for this type of product.*

Justification de la procédure d'examen de type / *Rational for type exam procedure*

Pour le marché Français application du décret 91-1292 relatif à la prévention des risques liés à l'utilisation des articles de puériculture : une procédure d'examen de type est requise selon article 4.2, dans la mesure où

- aucune norme applicable n'est publiée au JORF, ou
- la norme applicable au produit ne couvre pas tous les risques liés à l'utilisation de ce produit, ou
- le produit présente une fonction supplémentaire qui n'est pas couverte par une norme publiée au JORF

For French Market application of Decree 91-1292 on prevention of risks linked to the use of child care articles: a type examination procedure is required in accordance with article 4.2, as

- no applicable standard is published to the JORF.
- the applicable standard does not cover all risks due to the use of the product
- the product presents an additional function not covered by any published standard

Remarques

- 1- Ce protocole s'inspire de la directive 98/34/CE. Il ne donne présomption de conformité qu'aux exigences générales de sécurité de la Directive 2001/95/CE et donne conformité aux exigences du Décret 91-1292
- 2- Ce protocole ne traite pas des incidents qui pourraient se produire au cours d'une mauvaise utilisation non raisonnablement prévisible du produit considéré et si le produit est utilisé de manière imprudente sans tenir compte des avertissements et instructions d'usage délivrés avec le produit, ou les cas où l'enfant serait laissé sans surveillance dans le produit.
- 3- Il est précisé que les effets du vieillissement et de la dégradation des matériaux ne sont pas inclus.

Notices:

- 1- This protocol is based on procedures laid down in Directive 98/34/EC. It only presumed to conform to the general safety requirement of Directive 2001/95/EC and conforms to the requirements set forth in Decree 91-1292.
- 2- This protocol does not address incidents in which specified products are unreasonably misused, are used in a careless manner that disregards the warnings and instructions that are provided with each product, or those instances where the caregiver leaves the infant unattended in the product.
- 3- It should be noted that the effects of ageing and degradation of materials is not included.

5.1.3.2 De 600 mm au dessus du sol jusqu'à la zone d'accessibilité il ne doit y avoir aucun trou, espace ou ouverture accessible dans des conditions normales d'utilisation et laissant passer entièrement l'éprouvette de type 1 sauf s'il permet également à l'éprouvette de type 2 de passer entièrement, lors des essais effectués conformément au 5.3.3.2 de l'EN12221-2+A1.

5.1.3.2 Within the area 600 mm above the floor to the accessibility zone, there shall be no hole, gap or opening accessible in normal use that allows the type 1 head probe to pass completely through unless it also allows the type 2 head probe to pass completely through, when tested in accordance with 5.3.3.2 of EN 12221-2+A1.

5.1.3.3 De 200mm au-dessus du sol jusqu'à la zone d'accessibilité, un trou, un espace ou une ouverture, accessible dans des conditions normales d'utilisation et permettant à l'éprouvette de type 1 de passer entièrement, ne doit pas être une ouverture en V, selon la définition de 3.6 lors de l'essai conformément au 5.3.3.3 de l'EN12221-2+A1.

5.1.3.3 Within the area 200 mm above the floor to the accessibility zone any hole, gap or opening accessible in normal use that allows the type 1 head probe to pass completely through shall not be a V-shaped opening as defined in 3.6 when tested in accordance with 5.3.3.3 of EN 12221-2+A1.

5.1.4 Cordons et bandes de tissu (°)(G)

5.1.4 Cords, strings and other narrow fabrics (°)(G)

Les cordons et les bandes de tissu doivent avoir une longueur libre inférieure ou égale à 220 mm lors de l'essai effectué conformément au 5.3.4 de l'EN12221-2+A1.

Cords, strings and other narrow fabrics shall have a free length of not more than 220 mm when tested in accordance with 5.3.4 of EN 12221-2+A1.

5.1.5 Boucles (°)(G)

5.1.5 Loops (°)(G)

Les boucles ne doivent pas avoir une circonférence supérieure à 360 mm lors de l'essai effectué conformément au 5.3.5 de l'EN12221-2+A1.

Loops shall not have a peripheral dimension greater than 360 mm when tested in accordance with 5.3.5 of EN 12221-2+A1.

5.2 ARETES ET PARTIES SAILLANTES (°)(G)

5.2 EDGES AND PROTRUDING PARTS (°)(G)

Les arêtes et parties saillantes accessibles dans des conditions normales d'utilisation doivent être arrondies ou chanfreinées et exemptes d'ébarbures.

Edges and protruding parts accessible in normal use shall be rounded or chamfered and free of burrs.

Les bords supérieurs des barrières et de la surface à langer doivent avoir un rayon d'au moins 2 mm.

The upper edges of the barriers and the changing surface shall have a radius of not less than 2 mm.

Ce document annule et remplace le document de même numéro émis antérieurement. Celui-ci doit être détruit ou retourné au laboratoire.

The present document voids and replaces any previously issued document of the same job reference. It must be destroyed or returned to the laboratory

- d) une mention indiquant qu'il faut être conscient des risques engendrés par la présence d'un foyer ouvert ou autres sources de chaleur intense, comme les appareils de chauffage électrique ou à gaz, à proximité du dispositif à langer ;
d) be aware of the risk of open fires and other sources of strong heat, such as electric bar fires, gas fires, etc. in the near vicinity of the changing unit;
- e) des recommandations relatives au nettoyage et à l'entretien ;
e) cleaning and maintenance recommendations;
- f) le cas échéant, si le dispositif n'est pas fourni avec un matelas, des indications relatives au type de matelas à langer à utiliser et à la manière de le fixer pour disposer de barrières suffisantes ;
f) if a pad is not supplied with the unit, guidance on what changing pad, if any, is to be used and how to affix it in order to provide sufficient barriers;
- g) des informations afférentes à la hauteur adéquate du dispositif et des instructions de montage pour les dispositifs qui doivent être fixés au mur ;
g) information concerning the adequate height of the unit and mounting instructions for wall mounted units;
- h) le cas échéant, des informations indiquant que le dispositif à langer doit être fixé au mur afin d'utiliser le produit en toute sécurité et qu'il convient d'employer des fixations adaptées au mur ;
h) when applicable, information that the changing unit must be fixed to the wall for safe use of the product and that fastenings used should be appropriate to the wall;
- i) une mention indiquant que, si le dispositif à langer est muni de roues ou roulettes verrouillables, ces dernières doivent être bloquées lors de l'utilisation du dispositif ;
i) statement that when lockable castors or wheels are fitted, they shall be locked when the changing unit is in use;
- j) le poids de l'enfant auquel le produit est destiné: pour les dispositifs à langer de type 1 : 12 mois, jusqu'à 11 kg; pour les dispositifs à langer de type 2 : 15 kg
j) weight of the child for which the product is intended: for type 1 changing units: 12 months, up to 11 kg; for type 2 changing units: 15 kg
- k) un moyen d'identifier le produit, par exemple un numéro de modèle,
k) means of identifying the product e.g. model number;
- l) le nom, l'appellation commerciale ou la marque déposée du fabricant, du distributeur ou du détaillant ;
l) the name, registered trade name or registered trademark of either the manufacturer or distributor or retailer;
- m) une mention expliquant que toute partie additionnelle ou pièce de rechange doit seulement être obtenue du fabricant ou du distributeur ;
m) statement any additional or replacement parts shall only be obtained from the manufacturer or distributor;

CONDITIONS DE VALIDITE DE L'EXAMEN DE TYPE

SPECIFIC CONDITIONS OF VALIDITY FOR THE TYPE EXAMINATION

Obligations du demandeur / *Obligations of the applicant*

Le demandeur doit informer l'organisme agréé de toutes modifications effectuées sur le modèle approuvé qui doit recevoir, si nécessaire, une approbation complémentaire par un additif au rapport d'examen de type original.

The applicant shall inform the authorised body of all modifications made to the approved model which must be submitted, when necessary, to additional approval to the original type-examination test report.

Comme des avancées techniques et de nouveaux travaux de normalisation ou textes réglementaires peuvent affecter les conclusions de l'examen de type, le demandeur se tiendra régulièrement informé de toutes évolutions éventuelles relatives aux essais réalisés sur le modèle approuvé par l'organisme agréé.

As technical advances or new standardisation work or regulation could affect the conclusion of this type-examination, the applicant shall regularly keep himself informed of any potential evolution applicable to the tests carried out on the model approved by the authorised body.

Outre nos rapports d'essais et synthèses de documents, le dossier technique (prévu à l'article 4 du décret) qu'il incombe au responsable de la mise sur le marché de tenir à disposition des autorités de surveillance du marché doit comporter :

1- une description des moyens (tels que l'utilisation d'un protocole d'examen, d'une fiche technique) par lesquels le fabricant assure la conformité de sa production au modèle agréé

2- l'adresse des lieux de fabrication & d'entreposage

3- des renseignements détaillés concernant la conception et la fabrication

In accordance with the provision of art4 of the Decree, the organism responsible for placing on the market shall keep available to the market surveillance authorities the following technical documentation enclosing test reports and document summary, as :

1- full description of the means by which the manufacturer assures conformity of his production to the approved model (such as examination process, technical data sheet)

2- address of manufacturing and storing places

3- detailed information on design and manufacturing process

Validité de l'Examen de type / *Specific conditions of the type Examination*

Le présent examen de type ne s'applique qu'à l'article testé et pour les essais réalisés consignés dans le présent rapport d'essais.

This type examination applies only to the tested model submitted to the tests specified in this test report

Il n'implique pas que l'organisme agréé a réalisé une surveillance ou un contrôle de fabrication.

It does not imply that the authorised body has performed any surveillance or control of its manufacture

Il tient compte des données officielles à la date d'émission du document :

1- Toute modification des référentiels ou réglementations appliqués invalide la procédure d'examen de type menée.

2- Toute modification du produit, de quelque nature qu'elle soit, devra entraîner une nouvelle demande d'examen de type.

This type-examination take into account official data available at the date of its emission

1- any change in the standards or legislation used invalidates the type - examination process carried out

2- any change of the product, whatever it is, shall initiate a new demand of type - examination

Des copies peuvent être délivrées au demandeur.

Copies of the present test report are available upon request by the applicant

Annexe Page 1/5

**PRODUIT CONSIDERE
PRODUCT CONSIDERED :**
**CHAMP D'APPLICATION DU PRESENT CAHIER DES CHARGES
SCOPE OF THIS PROTOCOL**
JUSTIFICATION DE LA PROCEDURE D'EXAMEN DE TYPE

- Pour le marché Français application du décret 91-1292 relatif à la prévention des risques liés à l'utilisation des articles de puériculture, modifié par décret 2019-1007 du 30.09.2019 : une procédure d'examen de type est requise selon article 4.2, dans la mesure où
 - la norme applicable au produit ne couvre pas tous les risques liés à l'utilisation de ce produit

La norme EN 12221 applicable aux dispositifs à langer ne couvre pas les produits utilisés en collectivité.

L'objet du présent examen de type est d'intégrer les exigences et essais complémentaires pour couvrir cette utilisation.

RATIONALE FOR TYPE EXAMINATION PROCEDURE

- *For French Market application of Decree 91-1292 on prevention of risks linked to the use of child care articles, modified by the Decree 2019-1007 of 30.09.2019: a type examination procedure is required in accordance with article 4.2, as*
 - the applicable standard does not cover all risks due to the use of the product*

The standard EN 12221 applicable to changing unit does not cover contract use.

The aim of the present type examination is to include additional requirements and tests to cover this use.

Documents normatifs utilisés pour l'établissement de ce protocole
Reference standard documents used to establish this protocol

CEN TR 13387-2/3 : 2018	Articles de puériculture : guide sur la sécurité <ul style="list-style-type: none"> - Exigences chimiques - Exigences mécaniques et physiques 	Child care articles – Safety guidelines <ul style="list-style-type: none"> - Chemical requirements - Physical and mechanical requirements
EN 12221-1/2 +A1 : 2013	Articles de puériculture - Dispositif à langer à usage domestique	Child care article - Changing units for domestic use

Décret 91-1292 (annexe) French decree 91-1292 (Annex)	Approche par risque / justification (basée sur les référentiels listés ci-dessus) Hazard based approach / rationale (based on standards listed above)	Référentiel appliqué Standard applied	Résultat Result
II – Risques particuliers / Particular risks			
<p>1. Propriétés physiques et mécaniques / Physical and mechanical properties Les articles de puériculture doivent satisfaire aux exigences suivantes / Child care articles shall comply with the following requirements:</p>			
a) Ils doivent être stables et résister aux contraintes mécaniques et physiques auxquelles ils sont soumis lors d'une utilisation normale ou raisonnablement prévisible sans se briser ou subir de déformation dangereuse pour l'enfant <i>They shall be stable and must have the requisite mechanical strength to withstand the stresses to which they are subjected during normal or foreseeable use without breaking or becoming liable to distortion at the risk of causing physical injury.</i>			
Essais de résistance Statique Static strength test	<p>Charger le dispositif à l'aide d'une masse de 50kg tous les 0,6 m de la longueur du dispositif. Laisser reposer pendant une heure. A l'issue de cet essai le produit doit rester opérationnel.</p> <p><i>Charge the device with a mass of 50kg every 0.6m of the length of the device Let rest for an hour After the test, the product shall remain operational.</i></p>		Satisfaisant / Pass
Essais de durabilité Durability test	<p>Force de 250 N, temps d'application : 2 s, Cycle 10 000 Lieu d'appui : 150 mm du bord le plus défavorable A l'issue de cet essai le dispositif doit rester opérationnel.</p> <p><i>Force of 250 N, application time: 2s, 10 000 cycles Applied at 150 mm of the most onerous edge. After the test, the device must remain operational</i></p>		Satisfaisant / Pass
b) Ils ne doivent pas, par leurs caractéristiques, et notamment par la présence d'arêtes ou saillies, le mode d'assemblage de leurs éléments fixes et mobiles ou le mouvement d'éléments mobiles, présenter pour l'enfant des risques d'atteinte à l'intégrité physique tels que lésion, coupure, pincement, étranglement ou suffocation <i>By their characteristics, they shall not present any risk of injury such as lesion, cutting, pinching, strangulation or suffocation which could be caused in particular by sharp edges or protruding parts, assembly of fixed and moving components or by the movement of moving parts</i>			
Coincements Entrapment hazards	Exigences couvertes par la EN 12221 <i>Requirement covered by the EN 12221</i>		
	<p>La taille des trous dans les matériaux ajourés (filets, ...) à l'intérieur du produit doit être inférieure à 7 mm <i>The size of the holes in mesh materials within the product shall be less than 7 mm.</i></p>	TR 13387-3 § 6.6	Non Applicable / Not Applicable
Dangers d'enchevêtrement Entanglement hazards	<p>Le produit ne doit pas comporter de système de retenue (ceinture, harnais ...) <i>The product shall not include any restraint system (belt, harness ...)</i></p>		Satisfaisant / Pass
c) Les dispositifs de sécurité tels que verrouillage et freinage, installés sur un article de puériculture, doivent être efficaces et ne doivent pas pouvoir être actionnés par l'enfant <i>Safety devices such as locking mechanisms or braking devices when fitted on a child care article, shall be effective and shall not be able to be operated by a child</i>			
Exigences couvertes par la EN 12221			

Décret 91-1292 (annexe) French decree 91-1292 (Annex)	Approche par risque / justification (basée sur les référentiels listés ci-dessus) Hazard based approach / rationale (based on standards listed above)	Référentiel appliqué Standard applied	Résultat Result
<i>Requirement covered by the EN 12221</i>			
d) Les éléments qui peuvent être démontés sans l'emploi d'un outil doivent être de dimensions suffisantes pour éviter d'être avalés ou inhalés par l'enfant <i>Components which may be removed without the aid of a tool, shall be of such dimensions as to prevent them being swallowed or inhaled</i>			
Exigences couvertes par la EN 12221 <i>Requirement covered by the EN 12221</i>			
e) Lorsqu'il s'agit d'articles qui comportent des harnais ou ceintures de sécurité, ces éléments doivent être ajustables à la taille de l'enfant et disposer d'un système de fermeture et de réglage qui évite leur glissement <i>Harnesses or safety belts fitted on child care articles shall be adjustable to the size of the child and they shall have a closing and adjusting system which avoids any slippage.</i>			
Non applicable pour ce type de produit. Not applicable for this type of product.			
2. Inflammabilité Flammability			
Les articles de puériculture doivent être composés soit de matériaux qui ne brûlent pas sous l'action directe d'une flamme, d'une étincelle ou de toute autre foyer potentiel d'incendie, soit de matériaux qui s'enflamment difficilement (la flamme s'éteint dès qu'il n'y a plus de cause d'incendie), soit, lorsqu'ils sont inflammables, de matériaux qui brûlent lentement avec une faible vitesse de propagation de la flamme <i>Child care articles shall be made of materials that either do not burn if directly exposed to a flame or spark or other potential source of fire; or are not readily flammable (the flame goes out as soon as the fire cause disappears); or, if they do ignite, they burn slowly and present a low rate of spread of the flame</i>			
Exigences couvertes par la EN 12221 <i>Requirement covered by the EN 12221</i>			
3. Propriétés chimiques Chemical properties			
a) Les articles de puériculture ne doivent pas présenter, dans leur utilisation normale ou raisonnablement prévisible, de risques pour la santé par ingestion, inhalation ou contact avec la peau, les muqueuses ou les yeux <i>Child care articles shall not present during normal or foreseeable use, any health hazards by ingestion, inhalation or contact with the skin, mucous tissues or eyes.</i>			
RAPPEL : RESPECT DES EXIGENCES DU REGLEMENT REACH REMINDER: REQUIREMENTS SET FORTH IN REACH REGULATION ARE APPLICABLE			
b) En cas de combustion, les articles de puériculture ne doivent pas dégager de gaz toxiques <i>In case of combustion child care articles shall not emit toxic gas</i>			
En l'absence de méthode d'évaluation pertinente et adaptée, on peut supposer que la conformité à toutes les exigences en matière de substances chimiques, liée aux exigences relatives à l'inflammabilité, assurera la conformité à cette clause du décret <i>Without any relevant and appropriate test method, it is considered that compliance with all requirements applicable for chemical substances, combined with flammability requirements, will ensure this provision of the Decree is met.</i>			
c) Les parties peintes, vernies, laquées ou recouvertes de substances similaires, les parties constituées de matériaux colorés dans la masse et les parties constituées de textiles teints qui peuvent être atteints par la bouche de l'enfant, doivent être réalisés avec des produits qui ne contiennent pas, à l'état soluble ou à l'état de composés solubles, des teneurs en métaux lourds présentant un danger en cas d'ingestion par l'enfant <i>Any coating of paint, varnish, lacquer or similar substances, parts made of mass-colored materials, and dyed textiles which may come into contact with the child's mouth, shall be made of products that do not contain in their soluble state or soluble compounds state, a metal content that may present a hazard in case of ingestion by the child</i>			

Décret 91-1292 (annexe) French decree 91-1292 (Annex)	Approche par risque / justification (basée sur les référentiels listés ci-dessus) Hazard based approach / rationale (based on standards listed above)	Référentiel appliqué Standard applied	Résultat Result
Exigences couvertes par la EN 12221 Requirement covered by the EN 12221			
4. Hygiène <i>Hygiene</i>
